

Derma 2.0®

Fundamental Considerations and Precautions:

This procedure must be carried out by a qualified professional.

- The products, if injected, **MUST NOT** be used if they are already open! This means that the product must be extracted from the vial immediately before use.
- The products are ready for use. The products **MUST NOT** be diluted or added with sterile solution, lidocaine, xylocaine, prilocaine or other anesthetic agents.
- Before proceeding with the treatment, it is **ALWAYS** advisable to carry out a patch test on a hidden part of the body in order to verify any allergies or intolerances of the patient towards the product.
- Mild Swelling, edema, redness, itching, heat on the treated area are always normal effects deriving from the treatment and do not depend on the product. They usually resolve spontaneously in a few days without any intervention by the practitioner.

Preparation for Meso treatment D 2.0®:

1. Prepare all the necessary material;
2. Remove all traces of make-up preferably using micellar water that does not leave oily residues.

Cleanse with a foaming detergent chosen according to the type of skin to be treated (DERMA-HYDRATING MOUSSE or a chosen cleanser such as Stayve)

3. Disinfect the area to be treated
4. Before starting the procedure ALWAYS carry out a patch test in a hidden area of the face (behind the ears) by injecting 2 IU of product superficially in the dermal area (for face mesotherapy) and 2 IU of product deeply directly intra adipose (for body mesotherapy) and wait a few minutes to observe the reaction. If the patient does not feel excessive discomfort, but only mild itching and heat, treatment can proceed.
5. Select the DERMA 2.0 COCKTAIL depending on the main imperfection to be treated and aspirate the contents with a syringe, draw up through a drawing up needle, into an empty 1 or 2ml syringe. Take needle off and change to chosen needle for mesotherapy.

(we suggest to aspirate the cocktail out of the vial a 18G needle into a 2-3 ml syringe (for face) and 5-10ml syringe (for body):

- DERMA-BIO COCKTAIL: Complete Biorevitalization
- DERMA-HYDRATING COCKTAIL: Lack of Hydration
- DERMA-EYE COCKTAIL: Dark circles and bags
- DERMA-LIFTING COCKTAIL: Dynamic wrinkles, lifting effect
- DERMA-REPAIR COCKTAIL: Scars, post acne scars, stretch marks
- DERMA-FIRMING COCKTAIL: Loss of tone and firmness
- DERMA-CELU COCKTAIL: Cellulite, liquid retention

6. For face mesotherapy we suggest the use of 4-6mm 30-33G needles.

7. For body mesotherapy we suggest the use of needles 30-33G not less than 12mm

Meso Treatment D 2.0®

FIRST do an in depth consultation, this is to determine what the client is looking to achieve, their concerns and to give a realistic view on how many treatment they may need, and to also manage expectations. Only you can determine face to face how many treatments they will need.

The Derma 2.0 range can last up to 9 to 12 months once a full course of treatments has been completed, with one maintenance session in between. (results are down to each individual, lifestyle and concerns.)

a) Face, Lower Jaw and Face contour, Neck, Décolleté, Hands, Stretch marks:

PRODUCTS WHICH CAN BE USED IN THIS AREA: DERMA-BIO COCKTAIL, DERMA-REPAIR COCKTAIL, DERMA-HYDRATING COCKTAIL, DERMA LIFTING COCKTAIL, DERMA-FIRMING COCKTAIL

The mesotherapy injection depth is intradermal. Needle with 45 ° inclination and deposits of maximum 2-3 IU per injection point. The practitioner can follow the preferred technique such as dermo epidermic level known as 'papula' and intradermic level known as 'nappage'.

The injections must be 0,5mm/1cm apart from each other until they completely cover the area to be treated.

b) Eyes contour:

PRODUCTS WHICH CAN BE USED IN THIS AREA: DERMA-BIO COCKTAIL, DERMA-EYE COCKTAIL (only for bags and dark circles)

Injections MUST be superficial and carried out away from the upper and lower mobile eyelid area. Carry out the injections exclusively on the eye contour, carefully avoiding the area of the upper and lower mobile eyelids. Needle angle 30 ° and deposits of 2 IU maximum per injection site. Derma Eye is 0.4ml per eye, UNDER the bags OR orbital rim, EXTREMELY SUPERFICIAL INJECTIONS.

The injections must be 0.5mm apart from each other until they completely cover the area to be treated.

c) Abdomen, hips, internal and external thighs, internal and external knees, legs, PRODUCTS WHICH CAN BE USED IN THIS AREA: DERMA-CELU COCKTAIL.

The injections MUST be made at an angle of 90 ° and ONLY AND EXCLUSIVELY directly inside the adipose tissue with a needle of 12mm 30-33G and depositing 10 IU of product per point.

The injections must be 1 cm apart from each other until they completely cover the area to be treated.

After treatment in advice:

a) Face, Lower jaw and Face contour, Neck, Décolleté, Hands, Eye contour

After the treatment it is always advisable to apply a cooler for at least 5 minutes. To relieve the discomfort deriving from the treatment, it is possible to apply a thin layer of DERMA-REGEN MASK post-treatment soothing mask and leave on for 10 minutes, then Apply the DERMA-SUN 50+ solar filter.

b) Body

After the treatment it is always advisable to apply a cooler for at least 5 minutes.

After treatment home maintenance advice:

In the days following the treatment, we recommend specific cleansing based on the type of skin for the entire duration of the work, DERMA-HYDRATING MOUSSE or DERMA-PURIFYING MOUSSE.

In order to keep the treated area hydrated, soothed and protected, it is recommended to use the DERMA-REGEN MASK and the DERMA-SUN 50+ SUNSCREEN FILTER at home, morning and evening, every day and throughout the duration of the protocol.

In the 48 hours following the treatment, the patient is advised to avoid sun exposure and intense physical activity. In order to maintain the results, it is recommended to apply the appropriate home maintenance cream day and night, chosen according to the type of imperfection treated.

- DERMA-BIO CREAM: Aged skin / Complete Biorevitalization
- DERMA-WHITENING CREAM: Skin with dark spot, photoaged skin
- DERMA-PURIFYING CREAM: Acne prone skin and hyperseborrhea
- DERMA-EYE CREAM AND SERUM: Bags and dark circles
- DERMA-CELU CREAM: Cellulite, retention of fluid
