

Derma 2.0 Protocols and Usage Guide

Derma 2.0 cocktails can be used with all Microneedling formats, Mesotherapy and transdermal delivery methods including Electroporation, Electrophoroporation, Iontophoresis, Sonophoresis and Hydroelectrophoresis. **Note:** Derma 2.0 Purifying Cocktail is not to be used with Mesotherapy or Microneedling, this is for topical or transdermal delivery methods only.

General Derma 2.0 cocktail tips:

- Assess your client. Analyse how well their skin absorbs the serum you are working with. This could be 2ml, it could be 4ml, amounts depend on the area, the product being used and the desired outcome.
- The only 2 products you can mix together are Derma Firming and Derma Repair.
- No Derma 2.0 products are designed to be used on or applied to the eyelids.
- General treatment plans for Derma 2.0 cocktails is between 2 and 4 sessions for maximum results, spaced 7-10 days apart. In some cases 6 sessions are required. **Note:** Derma Eye treatments are spaced 2 weeks apart.
- By topping up every 6 months with just a single treatment, results can be maintained for between 9 and 12 months.
- For optimum results, we recommend always using the Derma 2.0 pre and post treatment products.
- Each individual should have a tailor-made treatment plan. Patch tests are always recommended, this is often an insurance requirement too.

Every client is different, as are their skin goals. Select the most appropriate product/s for the condition they are trying to improve or their desired outcome and design a treatment plan centred around this.

Derma 2.0 Eye: Derma Eye is a powerful draining product designed for eye bag reduction. Do not use if there are no eye bags or puffiness. When your client is upright, mark the bottom of the bag, never go above the orbital rim. Inject whichever is lower. When injecting Derma Eye go in 2mm of your 4mm mesotherapy needle at 20 degrees. Space treatments apart 2 weeks to allow for drainage and use no more than/up to 0.2ml per eye. If microneedling, use a nano head on your chosen device.

Derma 2.0 Bio: This is for all round skin glow and affectionately known as the ultimate glass facial. Derma Bio is a complete facial bio revitalisation cocktail for face, neck, décolleté and hands. It can also be used under the eye and up to the lash line to improve dark circles and fine lines and wrinkles in this area. Maximum 0.2ml per eye. Derma Bio is the perfect ally for the treatment of minor and major signs caused by chrono aging.

Derma 2.0 Firming: This product is for lifting, firming and tightening the skin on the face and body that has lost tone. Strong firming and restructuring action with a powerful cocktail based on highly concentrated active substances like DMAE and organic silicon alongside essential amino acids.

Derma 2.0 Repair: Great for any skin imperfections, stretch marks, acne scarring, scars and keloid scars. Powerful mix of active substances with a cutting-edge formulation able to correct scars (especially as a treatment for acne scars), and revascularise stretch marks, even white ones thanks to innovative active ingredients. For use on face and body.

Derma 2.0 Lifting: A true tox alternative with ingredients that block the signal to the muscle. Derma Lifting facial lifting treatment with biomimetic peptides is an effective alternative to the best known lifting anti-wrinkle techniques. It is perfect for clients who want the lifting effects of Botox without any loss of facial expression.

Derma 2.0 Whitening: The ultimate solution for pigmentation, melasma, age spots etc. Excellent for breaking down the accumulations of melanin, preventing the formation of new spots. For use on all pigmented areas of skin.

Derma 2.0 Celu: Extremely effective treatment against cellulite. For use in all areas Cellulite is commonly found. This is a powerful mix of highly concentrated functional substances with draining and anti-cellulite action.

Derma 2.0 Hydrating: Based on linear medium molecular weight high-grade, non-crosslinked Hyaluronic Acid, perfect for dehydrated skin. Contains 10mg per ml of sodium hyaluronate. It can be used on the face, neck and décolleté.

Derma 2.0 Purifying: Complete cocktail specific for oily, impure and acne-prone skin based on natural extracts with antibacterial, sebostatic, soothing and depigmenting properties. Not to be used with Mesotherapy or Microneedling, this is for topical or transdermal delivery methods only, especially as it can be used on active acne and other problematic skin conditions.

Derma 2.0 Tone Up: Discover the magic of DMAE. Derma 2.0 Tone Up targets cases of loss of tone on the face and body. DMAE in sterile vials for advanced aesthetics. DMAE is a precursor of acetylcholine, its main action is to restore tone to the tissues. For use on the face and body.

Derma 2.0 Amino-Loss: Professional monoactive Carnitine in sterile vials for advanced aesthetics with a reducing effect. Effective against hair loss, Carnitine is widely used as an additional component in the treatment of alopecia as it significantly reduces the oxidation of sebum and the consequent obstruction of the follicular ostium. For use on the face and scalp.

Derma 2.0 Peels: The standard protocol for optimal results from all Derma 2.0 peels is 5 sessions, once per week. Before using any Derma 2.0 peels, ensure the skin is perfectly cleansed and degreased with the Pre-Treatment Degreasing Solution, avoiding the eye area and mucous membranes. Always let it sit for 30 seconds. The laying time, number of applications and the layers to obtain results of all Derma 2.0 chemical peels are indicative and may vary depending on the severity of the imperfections being treated. After the Derma 2.0 peel treatment, apply two layers of Derma 2.0 Post Peeling Neutralising solution.

Derma 2.0 Creams: These are an amazing add on to treatments and highly recommended to be applied immediately after any Derma 2.0 treatment. Many of the cocktails have their associated cream to help healing and enhance results. They are also perfect to decant and supply to your client for home aftercare or to resell the bottles to clients in your clinic.
