

Derma 2.0 Protocols and Usage Guide

Derma 2.0[®] cocktails and monoactives can be used with all Microneedling formats, Mesotherapy, Injection and Transdermal delivery methods including Electroporation, Iontophoresis, Sonophoresis and Hydroelectrophoresis. The range also includes Peels and Cosmetics. The key concept of the entire Derma 2.0[®] line is to return to the use of formulations containing active ingredients with scientifically proven properties that allow for concrete results. Medical grade, 100% Made in Italy.

Derma 2.0 Product Usage Tips

- Assess your client. Analyse how well their skin absorbs the serum you are working with. This could be 2ml, it could be 4ml, amounts depend on the area, the product being used and the desired outcome.
- No Derma 2.0 products are designed to applied to the eyelids.
- General treatment plans for Derma 2.0 cocktails is between 2 and 4 sessions for maximum results, spaced 7-10 days apart. In some cases 6 sessions are required.
Note: Derma Eye/Derma Slim Up/Derma Remolding treatments are spaced 2 weeks apart.
- For mesotherapy and microneedling treatments with the Derma 2.0 cocktails and monoactives, a top up every 6 months with just a single treatment allows results to be maintained for 9 -12 months.
- For optimum results, we recommend always using the Derma 2.0 pre and post treatment products.
- Each individual should have a tailor-made treatment plan. Patch tests are always recommended, this is often an insurance requirement too.

Derma 2.0 Pre-Treatment

Derma 2.0 Hydrating Mousse: The perfect pre-treatment cleanser for dry and sensitive skin. Moisturising and cleansing foam with a delicate and effective formula. Highly moisturising action capable of renewing dehydrated and irritated skin.

Derma 2.0 Purifying Mousse: The perfect pre-treatment cleanser for oily skin. Derma-Purifying Mousse with antibacterial, astringent and purifying action. Delicate mousse for the daily hygiene of normal, combination, oily and/or acne-prone skin. Gently removes impurities without causing irritation while preserving skin hydration while minimising the overproduction of sebum. Thanks to its formula it prevents the appearance of comedones and blackheads.

Derma 2.0 Pre-Treatment Degreasing Solution: The perfect product to prep the skin before any needling, mesotherapy, peeling treatments. Applied with a well soaked gauze, the degreasing solution eliminates the hydrolipidic layer by balancing and acidifying the skin's pH.

Derma 2.0 Post-Treatment

Derma 2.0® offer medical grade post treatment products to ensure quick skin healing and maximum protection. All products incorporate advanced medical grade ingredients to maximise efficacy.

Derma 2.0 Regen Post Treatment Mask: Post treatment soothing and calming sensitive skin face mask – The active ingredients contained in the soothing calming post treatment face mask act in synergy to soothe, decongest and re-epithelialize the skin in the safest, fastest and most effective way. Apply immediately post needling, peeling or laser treatment.

Derma 2.0 Post Peeling Neutralising Solution: For post peel care. Post-Peeling Neutralising solution with alkaline Ph necessary for the deactivation of chemical peels that need to be blocked during the procedure or in the rinsing phase. Among the peels that need neutralisation we find: Glycolic acid, the Derma Purifying Peeling, the Derma Whitening Peeling and the Derma Hydrating Peeling.

Derma 2.0 SPF 50 Sunscreen: The active ingredients contained in the Derma 2.0 SPF 50 sunscreen/sun protection act in synergy to protect and hydrate. Protects against UVA and UVB rays following aesthetic and beauty treatments such as chemical peels, needling, laser and mesotherapy. Apply daily, especially in the days after any kind of treatment. 50ml airless Tube.

Derma 2.0 Cocktails

The Derma 2.0® cocktails allows practitioners to treat all types of imperfections: superficial and deep wrinkles, irregular skin texture, acne, spots, photoaging, stretch marks and scars.

Derma 2.0 Eye: Derma Eye is a powerful draining product designed for eye bag reduction. Do not use if there are no fluid eye bags or puffiness. For dark circles use Derma 2.0 Bio. When your client is upright, mark the bottom of the bag, never go above the orbital rim. Inject whichever is lower. Derma Eye is to be injected extremely superficially. Space treatments apart 2 weeks to allow for drainage. Use no more than 0.2ml per eye if it is a clients first session. For more severe bags, the maximum dose is 0.4ml per eye. If microneedling, use a nano head on your chosen device.

Derma 2.0 Bio: This is for all round skin glow and affectionately known as the ultimate glass facial. Derma Bio is a complete facial bio revitalisation cocktail for face, neck, décolleté and hands. It can also be used under the eye and up to the lash line to improve dark circles and fine lines and wrinkles in this area. Maximum 0.2ml per eye. Derma Bio is the perfect ally for the treatment of minor and major signs caused by chrono aging. Derma Bio contains a plethora of advanced ingredients alongside PDRN. The most advanced Polynucleotide product available.

Derma 2.0 Firming: This product is for lifting, firming and tightening the skin on the face and body that has lost tone. Strong firming and restructuring action with a powerful cocktail based on highly concentrated active ingredients: DMAE firming fluid, Organic silicon, Rejuline complex™, Hyaluronic Acid High molecular weight, Hyaluronic Acid Low molecular weight, Hydroxyproline, Proline, Lysine, Glycine, Acetyl Cysteine. CAN BE MIXED WITH DERMA 2.0 REPAIR.

Derma 2.0 Repair: Great for any skin imperfections, stretch marks, acne scarring, scars and keloid scars. Powerful mix of active substances with a cutting-edge formulation able to correct scars (especially as a treatment for acne scars), and revascularise stretch marks, even white ones thanks to innovative active ingredients. For use on face and body. CAN BE MIXED WITH DERMA 2.0 FIRMING.

Derma 2.0 Lifting: A true tox alternative with ingredients that block the signal to the muscle. Derma Lifting facial lifting treatment with biomimetic peptides is an effective alternative to the best-known lifting anti-wrinkle techniques. It is perfect for clients who want the lifting effects of Botox without any loss of facial expression. Argireline 5% (acetyl hexapeptide-8) and Leuphasyl (pentapeptide-18) 5%. This product effects significantly reduce the contraction of the mimic muscles responsible in dynamic wrinkle formation.

Derma 2.0 Whitening: The ultimate solution for pigmentation, melasma, age spots etc. Excellent for breaking down the accumulations of melanin, preventing the formation of new spots. For use on all pigmented areas of skin on face and body. Based on resorcinol, arbutin, succinic acid, azelaic acid, stabilized vitamin C, glutathione and a special complex of biomimetic peptides.

Derma 2.0 Celu: Extremely effective treatment against cellulite. For use in all areas Cellulite is commonly found. This is a powerful mix of highly concentrated functional substances with draining and anti-cellulite action. A special Pgc-1 protein modulator complex together with 20% carnitine, caffeine, centella asiatica, extracts of pineapple, horsetail, artichoke and ruscus.

Derma 2.0 Hydrating: Based on linear medium molecular weight high-grade, non-crosslinked Hyaluronic Acid, perfect for dehydrated skin. Contains 10mg per ml of sodium hyaluronate. It can be used on the face, neck and décolleté.

Derma 2.0 Purifying: Complete facial cocktail specific for oily, impure and acne-prone skin based on natural extracts with antibacterial, sebostatic, soothing and depigmenting properties. NOT to be used with Mesotherapy or Microneedling, this is for topical or transdermal delivery methods only, especially as it can be used on active acne and other problematic skin conditions.

Derma 2.0 Remolding: Remodelling treatment with Phosphatidylcholine and Deoxycholic acid with a reducing and lipolytic effect. It solubilises fats and reduces the volume of adipocytes. For use on chin and body. In the case of very large areas which therefore includes for example the hips, abdomen, chest etc. 3 entire vials can be used in a single session. Space sessions minimum 2 weeks apart.

If it is a very small area such as a double chin:

- considering that for each injection point a maximum of 10UI per point must be inoculated.
- which, tracing a grid on an area of a "normal" double chin, are approximately 20-25 points of 0.10ml (10UI) each. The total amount can be 2 to 2.5ml for a double chin.

No less than a 6mm needle can be used for this fat dissolve procedure, 12mm needle is ideal. Use a 6mm for smaller areas such as the chin. Minimum distance between injection points is 10mm in a grid

With lipolytic intralipotherapy practice (using the active substances sodium deoxycholate or phosphatidylcholine or combined) some fundamental points must be clarified:

To minimise discomfort, Lidocaine can be added to the solution to be injected: as per protocol, if the patient does not suffer from allergy or intolerance to the anaesthetic, 0.1 ml of lidocaine can be added to 10ml of final product. It's important to manage your clients, so they know what the treatment is all about, how they may feel, what to expect. In some patients pain is more tolerated, in others less so, you must always communicate this to the patient before the treatment and reassure them that the area could be painful for 24 hours.

Cold therapy with the application of ice every other 10 minutes is always recommended to minimise discomfort. Another precaution to be taken is the COMPRESSIVE bandage of the treated area: it must be a compressive bandage, to be kept on for at least 24 hours
Redness and swelling is absolutely NORMAL. Inject into the fat layer, not superficially, unless using microneedling or electroporation methods. This is very important. You must be fat dissolve trained, this is important to understand how the treatment works, more importantly passing this information and aftercare over to your clients.

Derma 2.0 Remolding can be mixed with Derma Slim Up in equal parts. The protocol is the same whether used separately or mixed.

Derma 2.0 Monoactives

Derma 2.0® Monoactives are single ingredient products that allow you to target skin concerns with maximum concentration monoactive serums. Now you can treat specific skin concerns like uneven skin tone, hair loss and regenerate skin tissue extremely quickly and effectively.

Derma 2.0 Tone Up: Discover the magic of DMAE. Derma 2.0 Tone Up targets cases of loss of tone on the face and body. DMAE in sterile vials for advanced aesthetics. DMAE is a precursor of acetylcholine, its main action is to restore tone to the tissues. For use on the face and body.

Derma 2.0 Amino-Loss: Professional monoactive Carnitine in sterile vials for advanced aesthetics with a reducing effect. Effective against hair loss, Carnitine is widely used as an additional component in the treatment of alopecia as it significantly reduces the oxidation of sebum and the consequent obstruction of the follicular ostium. For use on the face and scalp.

Derma 2.0 Restorer: Regenerating treatment in sterile vials for aesthetics based on organic silicon Derma-Restorer solution. Derma-Restorer solution, a regenerating antioxidant treatment based on organic silicon, acts in tissues as a catalyst for various reactions. Promotes the synthesis of collagen and elastin and improves connective structures. Can be used on under eyes, face and body.

Derma 2.0 Slim Up: Derma 2.0 Slim up solution 5x10ml is an effective treatment for the elimination of localised fat. Highly concentrated monoactive in vials for advanced aesthetics for treatments with a reducing effect. Deoxycholic acid/sodium deoxycholate vials. For use with injection, microneedling and electroporation. You need to be qualified in fat dissolve to utilise this product. For use on chin and body. Space sessions minimum 2 weeks apart.

In the case of very large areas which therefore includes for example the hips, abdomen, chest etc. 3 entire vials can be used in a single session.

See Derma 2.0 Remolding for further usage instructions. Derma Slim Up can be mixed with Derma Remolding in equal parts.

Derma 2.0 Peels

Derma 2.0's Bio Peel alongside their Pyruvic, Glycolic and Mandelic Peel options allow you to target specific skincare conditions with the best peels on the market. Improve pigmentation, scars, wrinkles, active acne and more!

Derma 2.0 Peels: The standard protocol for optimal results from all Derma 2.0 peels is 5 sessions, once per week. Before using any Derma 2.0 peels, ensure the skin is perfectly cleansed and degreased with the Pre-Treatment Degreasing Solution, avoiding the eye area and mucous membranes. Always let it sit for 30 seconds.

The laying time, number of applications and the layers to obtain results of all Derma 2.0 chemical peels are indicative and may vary depending on the severity of the imperfections being treated.

After the Derma 2.0 peel treatment, apply two layers of Derma 2.0 Post Peeling Neutralising solution. Follow with a layer of Derma 2.0 Regen Post Treatment Mask. Finish with Derma 2.0 SPF 50 for full protection.

Derma 2.0 PMU Remover

Derma 2.0 PMU Derma-Remover is a 100% Made In Italy safe and tested product for lightening semi-permanent make-up in the eyebrow area. A mixture of expertly selected acids to allow the resurfacing and consequent expulsion of the molecules that make up the pigments, finally allowing even the lightest pigments to be eliminated. Glycolic Acid and Lactic Acid (two of the most tolerated and well-known organic acids) it acts progressively and gradually to lighten semi-permanent tattoos.

Instructional step by step video, please ensure subtitles are switched on as this is in Italian:

Derma 2.0 Cosmetics

Derma 2.0 Medical Grade professional skin care. Perfect for daily use and as an amazing solution to look after the skin in between professional treatments. They are also perfect to resell to clients in your clinic which also allows clients to enhance their Derma 2.0 treatment results at home. Advanced ingredients free of synthetic antioxidants such as BHT and BHA, aluminium salts, aggressive SLS and SLES surfactants.

Derma 2.0 Purifying Face Cream: Purifying anti blemish face cream, adjuvant in treatment of acne (also in active phase) and skin imperfections such enlarged pores, blackheads and hyperseborrea. Its global action corrects, prevents, and treats (at any age), tight pores and prevents them from enlarging while correcting irregularities in the skin's texture.

Derma 2.0 Hydrating Cream: Hydrating and moisturising face cream with light texture and very quickly absorbed. This is an intensive skin care product designed to provide a comprehensive solution to the phenomenon of skin dehydration.

Derma 2.0 Bio Face Cream: Complete Biorevitalising and antiwrinkle treatment which fights against the visible signs associated with the 3 types of ageing to provide a truly complete anti-ageing solution. Thanks to special complex of biomimetic peptides, amino acids, hyaluronic acid, ultra-pure plant extracts and eudermic oils, gives to the skin a more toned, soft, compact and bright appearance. Suitable for all skin types, even the most sensitive and exigent.

Derma 2.0 Eye Serum and Cream: Cream for eye bags and eye serum anti dark circles skincare treatment Derma-Eye® Serum & Cream.

The eye contour tends to age faster than the general skin of the face and for this reason it is good to give this area due attention. Thanks to the special composition and combination of biomimetic peptides such as Tetrapeptide-5, Tetrapeptide-14, Decapeptide-21, Decapeptide-22, Nonapeptide-14, Oligopeptide-78, vitamins and a lot of natural extracts, Derma 2.0 Eye Serum and Cream treatment against bags and dark circles, helps to significantly reduce bags and dark circles giving more brightness to the eye.

Derma 2.0 Celu Cream: Derma Celu Draining Anti Cellulite Body Cream. Targeted treatment against cellulite blemishes that makes the three types of adipocytes at the origin of the appearance of the pads resume good habits, for a reinforced and increasingly innovative slimming action. The gel-cream texture gives an intense sensation of freshness and lightness, firms and reshapes thanks to the lifting effect, leaving the skin soft and velvety.

Derma 2.0 Whitening Cream: Depigmenting and whitening action treatment recommended to prevent and treat hyper pigmentations such as sun spots, senile lentigo, melasma, chloasma and photo-aging damage. Provides an intense, overall brightening and anti-dark spots action.
